

LITTLE APLEY, 1874

HISTORICAL CONTEXT

Little Appley, 1874

...d in coastal intrigue, wine merchant prestige, and the legendary valor of our local wartime heroes.

Appley Manor 30-Day Digital Sprint

A founder-partner pilot to turn renewed investment into visible demand, direct enquiries and measurable local profile growth.

Prepared by IsleConnect / Vectis ONE

Outcome-led digital storytelling, QR visitor journeys, premium social assets and reporting.

1. The Sprint Objective

Appley Manor is entering a new chapter: renewed investment, improved guest facilities, stronger event potential and a story that already carries local trust. The 30-day sprint is designed to make that investment visible, memorable and measurable without disrupting the existing team.

The aim is not to replace current marketing activity. It is to add a specialist campaign layer that helps the owner, general manager and marketing team turn physical improvements into digital demand.

More enquiries Primary outcome Weddings, functions, dining, events and stays.	New chapter Positioning Same Manor heart, renewed visitor experience.	Measurable Proof QR scans, clicks, views, enquiries and campaign learning.
--	--	---

What IsleConnect provides • A structured digital campaign around Appley Manor’s investment. • Premium story-led assets that feel consistent with a heritage venue. • QR-linked visitor journeys that connect physical place to digital action. • Simple reporting that shows whether attention is becoming enquiry demand.	What Appley Manor gets • A founder-partner showcase package at a keen introductory price. • Clear campaign pillars for the marketing manager to use immediately. • A stronger public story for weddings, dog-friendly dining, heritage and events. • A low-risk way to test the system before a monthly retainer.
--	---

2. Why A Structured Sprint Matters

Social media no longer works like a simple noticeboard. Platforms test each post with a smaller initial audience before deciding whether to expand reach. Posts that earn stronger early signals - video completion, shares, saves, comments, direct messages and clicks - are more likely to receive wider distribution.

For Appley Manor, this means the opportunity is not simply “more posts”. The opportunity is a disciplined content system built around memorable stories, premium visuals and clear visitor actions.

Old habit	Better 2026 approach	Why it matters
Posting when there is an offer or update.	Maintain an always-on rhythm around the Manor's core stories.	Keeps Appley Manor mentally available during the long booking window.
Counting likes as the main success measure.	Track saves, shares, video completion, clicks and enquiries.	These actions show stronger intent than passive likes.
Using isolated posts with no next step.	Connect posts to landing pages, QR journeys and enquiry prompts.	Turns attention into measurable business outcomes.
Rushed images or generic templates.	High-fluency, premium visual design that matches the venue quality.	Online design acts as a trust signal for the physical guest experience.

Plain-English explanation for the Appley Manor team

“Facebook and Instagram are like a doorman. They let a post into a small room first. If people watch, share, save, message or click, the doorman opens the next room. If the early signals are weak, the door closes. Our job is to give each Appley Manor post a clear reason to pass that first test.”

3. The 30-Day Sprint Plan

The sprint is built to be lean, fast and practical. It gives Appley Manor a visible campaign structure, usable creative assets, a QR visitor journey and clear performance learning within one month.

Week	Focus	Key actions	Outputs
Week 1	Discovery and campaign architecture	On-site discussion, review public profile, confirm priority business goals, map customer journeys and agree campaign pillars.	Campaign plan, content pillars, call-to-action map, sprint schedule.
Week 2	Story and asset production	Create premium messaging, captions, visual directions and AI-assisted assets around Appley Manor's new chapter.	Social content concepts, hero copy, QR story direction, time-slip/demo asset refinements.
Week 3	Landing journey and QR demo	Create or prototype a visitor journey linking physical place to digital action: heritage story, venue profile, enquiry prompt and offer/event pathway.	QR demo route, venue profile structure, landing-page concept, enquiry-flow recommendations.
Week 4	Reporting and handover	Package the campaign, review early signals, prepare dashboard/reporting template and agree next steps for continuation.	30-day report, recommendations, retainer options, case-study permission review.

Sprint theme: “Same Manor Heart. New Chapter.”

This line reassures loyal guests that the warmth remains, while giving new customers a clear reason to look again.

4. Campaign Pillars Tailored To Appley Manor

The sprint organises Appley Manor’s renewed attractions into four clear story pillars. Each pillar can feed Facebook, Instagram, web pages, QR touchpoints and email/CRM follow-up.

Pillar	Story angle	Example campaign message	Best outcome
1. Same Heart, New Chapter	Continuity of trusted hospitality with renewed investment.	“The warm Appley welcome remains - now with fresh spaces, improved comfort and a renewed vision.”	Reassures locals and regular guests.
2. Dog-Friendly Appley	Appley Park walks, coastal visits and indoor dog-friendly dining.	“Walk Appley Park, then dine indoors with your dog beside you.”	Lunch/dining visits and social sharing.
3. Timeless Celebrations	Weddings, marquee, functions and outdoor ceremony potential.	“Historic Manor setting. Coastal surroundings. A new chapter for celebrations.”	Wedding and private function enquiries.
4. The Enchanted Estate	Grounds, secret/coastal path, outdoor cinema, Appley Park connection and heritage.	“From beach walk to Manor table - discover the Appley route.”	Visitor discovery, events and local profile.

Example visual direction: a “time-slip” style heritage-to-modern transition that turns Appley Manor’s location and renewed investment into a memorable digital story.

5. Services Delivered Within The 30 Days

The founder-partner sprint keeps the scope lean while still delivering strategic value. It is designed to support the existing team with structure, assets and reporting rather than create operational disruption.

Service area	Included in the 30-day sprint
Strategy and campaign planning	On-site strategy discussion, campaign pillar map, priority audience definition, call-to-action structure and 30-day content plan.
Premium social content support	8-12 post/reel concepts with captions, hooks and suggested formats built around the four Appley Manor pillars.
AI-enhanced creative assets	2-3 premium visual/demo assets, including a time-slip or heritage-led concept suitable for social preview and stakeholder discussion.
QR visitor journey demo	Prototype QR route concept linking a physical touchpoint to a mobile story, venue profile and commercial next step.
Landing journey and enquiry pathway	Recommended structure for a wedding/function, dog-friendly dining or new chapter landing page with clear enquiry prompts.
Measurement and reporting	Simple reporting template covering views, QR scans, saves/shares, link clicks, enquiry signals and recommendations for next month.
Team support	Light collaboration with the owner, general manager or marketing manager. The sprint is designed to add capacity, not replace the human team.

Scope discipline

The sprint does not include daily social media management, paid advertising management, full website rebuild, professional photography, unlimited revisions, booking engine integration or full CRM implementation. These can be added later if the pilot proves value.

6. Measurement, Founder-Partner Pricing and Continuation

The sprint is priced as a founder-partner pilot because Appley Manor is a strong showcase for the IsleConnect model: heritage, hospitality, new investment, events, local trust and a clear visitor journey. The price is keen, but the value is not cheapened because the scope is defined and the exchange is clear.

Founder Partner Pilot	Price	What it buys
30-day Appley Manor Digital Sprint	£950	Strategy, campaign structure, content concepts, visual/demo assets, QR journey demo, landing-page thinking and basic reporting.
Optional continuation: Founder Partner Retainer	£750/month for 3 months	Monthly campaign planning, content support, QR/landing page updates, reporting and priority IsleConnect showcase status.
Future standard growth partner rate	£1,250+/month	Introduced after proof of value, once the system is delivering consistent campaign support and measurable commercial insight.

What we measure

- Reach and impressions
- Video completion and saves/shares
- QR scans and page visits
- Link clicks and enquiry signals
- Campaign learning for the next month

Founder-partner exchange

- Preferential pilot price
- Permission to use selected work in portfolio
- Optional testimonial if satisfied
- Access to basic performance data
- Clear review meeting after 30 days

7. Next Steps

This sprint can begin quickly. The first step is a short decision meeting with the owner, general manager and/or marketing manager to agree priorities, access needs and the preferred first campaign angle.

Step	Action	Owner
1	Agree the founder-partner pilot and confirm the main business priority: weddings, dining, events, rooms or awareness.	Appley Manor + IsleConnect
2	Provide access to current public assets, brand preferences, key dates, existing content, and any planned announcements.	Appley Manor
3	Run the on-site strategy session and prepare the campaign map within the first week.	IsleConnect
4	Deliver sprint assets, QR demo, content plan and reporting framework across the 30-day period.	IsleConnect
5	Review results and decide whether to continue on the founder-partner retainer.	Both

Positioning line

**“You are upgrading the physical guest experience.
IsleConnect helps upgrade the digital guest journey to match.”**
